

CESAB

LI-ION

Small, light and energy efficient...

...with all the high-quality build and performance standards of the CESAB P200 range

Introducing the all new CESAB P216i

The all new CESAB P216i is the first powered pallet truck designed around our in-house modular Li-ion battery concept, which makes this low lifter exceptionally compact, light and energy efficient.

Increase your productivity with the new CESAB P216i

Lithium-ion battery
for increased productivity

One compact machine size
for all battery capacities

Extremely small and light
perfect in confined and weight restricted areas

Very low noise level
better comfort for users and their environments

Optimised corner control
for improved security for driver and load

Power inlet with external charger

"Fool-proof" connector with external charger

Connector with internal charger

5V USB outlet as standard

STANDARD TRUCK EXECUTION

- Three Li-ion capacities available: 50, 105 and 150Ah
- Centred lifting lug for easy maintenance
- Heavy duty welded forks
- Automatic speed reduction when cornering
- Easy to use controls
- Automatic braking
- Programmable access codes through PIN pad
- Automatic switch-off after pre-set time
- Auto-lock on ramps – no risk of rollback
- Low, 38 mm chassis to prevent foot injuries
- High, 6.0 km/h drive speed independent of the load
- Creep speed as standard
- Information display as standard
- Fixed AC drive motor for better reliability

SPECIFICATIONS

CESAB P216i

Service weight incl. battery	274 kg
Nominal capacity	1600 kg
Load centre	600 mm
Overall length	1569 mm
Length to fork face	419 mm
Overall width	730 mm
Turning radius (lifted/lowered)	1338/1400 mm
Travel speed, with/without Load	6.0/6.0 km/h
Drive motor rating S2 60 min	1.0 kW
Sound level EN 12053	59 dB(A)
